

Introducing Thermo Fisher Scientific's simplified project management support model

A streamlined approach that aligns your project management needs with our global expertise in clinical trial supply chain planning and management

Thermo Fisher Scientific is excited to introduce our simplified customer engagement model, uniquely tailored to meet your trial needs. Our strategic combination of global and site-based project oversight, demand and supply planning, inventory optimization, and partner governance is designed with the flexibility to support trials of any type. Our project management solutions leverage extensive global expertise, empowering drug developers of all sizes to optimize their clinical trial supply chains, enhance efficiencies, and reduce risks at every step.

Benefits you'll experience:

- ✓ Uniquely bundled project management solutions that move beyond the one-size-fits-all approach
- ✓ Designed to make collaborating with and navigating through Thermo Fisher easier and more efficient
- ✓ Enhanced global connectivity and better line of sight across all client-facing roles
- ✓ A simplified and more transparent quoting process, with clear accountability
- ✓ Greater ability to meet the specific needs of small and mid-size clinical trials of any complexity
- ✓ Improved customer experience for biotechnology and pharmaceutical clients
